

预浸料生产线  
PREPREG LINE

The new type hotmelt prepreg line named PS1 was developed and produced by Changzhou ORIT\_RS.

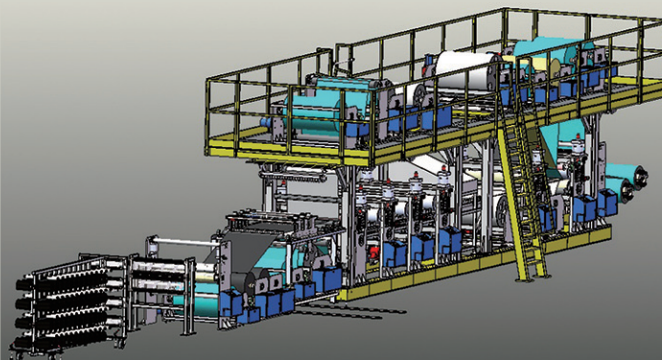

WORLD CLASS

MADE IN CHINA

Features as following:

- ✧ Excellent fiber tension control and spreading
- ✧ Accurate temperature control and gap adjustment
- ✧ Perfect equipment integration and control system
- ✧ Convenient operation

For more information, please access our website:

[WWW.ORIT.CN](http://WWW.ORIT.CN)

Technical Features:

- 1、Working width: 1000-1270 mm
- 2、Speed: 1.0~12 m/min
- 3、Temperature of heating rollers(max): 150℃
- 4、The diameter of compression roller: Φ320mm
- 5、Adjustable AC digital gap setting
- 6、Movable carbon fiber creel
- 7、Independent tension control for spreading
- 8、Accurate temperature control
- 9、Full AC servo control system
- 10、Program tension control for unwinding and winding
- 11、Typical applications: UD、Woven
- 12、Solid structure design and convenient operation
